

# Contents

<i>Foreword</i> .....	<i>xiii</i>
<i>About the Authors</i> .....	<i>xv</i>
<i>Acknowledgments</i> .....	<i>xvii</i>
<i>Introduction</i> .....	<i>xix</i>
<b>Chapter 1 Meeting the Challenges of the Web</b> .....	<b>1</b>
<i>What Are the Challenges of Web Development?</i> .....	<i>1</i>
<i>Creating Multitiered Applications for the Web</i> .....	<i>2</i>
<i>Using HTML and XML</i> .....	<i>9</i>
<i>Programming in the Internet Environment</i> .....	<i>17</i>
<i>ASP.NET Namespaces</i> .....	<i>27</i>
<i>Recap</i> .....	<i>36</i>
<b>Chapter 2 Creating a Web Application</b> .....	<b>37</b>
<i>Starting a Web Project</i> .....	<i>38</i>
<i>Using the Global.asax File</i> .....	<i>53</i>
<i>Cascading Style Sheets</i> .....	<i>69</i>
<i>Instrumentation and Tracing</i> .....	<i>83</i>
<i>Recap</i> .....	<i>91</i>
<b>Chapter 3 Creating a Web Page</b> .....	<b>93</b>
<i>Understanding the ASP.NET Control Tree</i> .....	<i>94</i>
<i>Unraveling the Page Processing Sequence</i> .....	<i>101</i>
<i>Understanding Web Form Classes</i> .....	<i>120</i>
<i>Recap</i> .....	<i>137</i>

<b>Chapter 4 Using the HTML Controls</b> .....	139
<i>The HTMLControls Namespace</i> .....	140
<i>Using Image Controls</i> .....	144
<i>Using Container Controls</i> .....	152
<i>Using Input Controls</i> .....	201
<i>Using Client Events</i> .....	217
<i>Recap</i> .....	221
<b>Chapter 5 Using the Web Server Controls</b> .....	223
<i>Understanding the Capabilities of Web Server Controls</i> .....	224
<i>The Web Controls Namespace</i> .....	228
<i>Using Basic Web Server Controls</i> .....	242
<i>Using Complex Web Server Controls</i> .....	285
<i>Recap</i> .....	301
<b>Chapter 6 Using the Validation Controls</b> .....	303
<i>Adding a Validation Control to a Web Page</i> .....	304
<i>The Validation Base Classes</i> .....	307
<i>Validating Required Fields</i> .....	311
<i>Validating Field Formats</i> .....	312
<i>Validating Field Values</i> .....	321
<i>Performing Custom Validation</i> .....	326
<i>Using the ValidationSummary Control</i> .....	332
<i>Recap</i> .....	339
<b>Chapter 7 Using Data-Bound Controls</b> .....	341
<i>Data Binding</i> .....	341
<i>Using the Collection Controls</i> .....	350
<i>Recap</i> .....	399
<b>Chapter 8 Developing an XML Web Service</b> .....	401
<i>Describing an XML Web Service</i> .....	402
<i>Communicating with an XML Web Service</i> .....	405
<i>Locating an XML Web Service</i> .....	409
<i>Creating an XML Web Service</i> .....	411
<i>Accessing an XML Web Service</i> .....	423
<i>Returning an Array from a XML Web Method</i> .....	433
<i>Returning a Structure from a Web Method</i> .....	435

<i>Exchanging Objects with a Web Method</i> .....	437
<i>Using SOAP Headers</i> .....	439
<i>Recap</i> .....	451
<b>Chapter 9 Accessing Relational Data</b> .....	453
<i>What Is Special About ADO.NET?</i> .....	454
<i>The ADO.NET DataSet Class</i> .....	455
<i>Data Providers</i> .....	458
<i>Accessing a Database from a Dataset</i> .....	462
<i>Populating a Database</i> .....	483
<i>Using a Data Reader</i> .....	496
<i>Improving Column Names via Mapping</i> .....	501
<i>Using Data Views</i> .....	504
<i>Accessing a Dataset via an XML Web Service</i> .....	508
<i>Editing a Database Table from a DataGrid</i> .....	509
<i>Validating Data Table Entries</i> .....	517
<i>Recap</i> .....	529
<b>Chapter 10 Creating a User Control</b> .....	531
<i>Understanding User Controls</i> .....	532
<i>Creating a Simple User Control</i> .....	537
<i>Exposing User Control Properties</i> .....	542
<i>Changing Content Dynamically</i> .....	547
<i>Handling User Control Client Events</i> .....	553
<i>Converting a Web Form to a User Control</i> .....	560
<i>Caching Output for Reuse</i> .....	561
<i>Recap</i> .....	573
<b>Chapter 11 Creating a Rendered Control</b> .....	575
<i>Creating a Web Control Library</i> .....	575
<i>Creating a Simple Rendered Control</i> .....	577
<i>Registering and Using a Custom Control</i> .....	585
<i>Using Web Control Properties</i> .....	594
<i>Rendering Content Changes Dynamically</i> .....	598
<i>HandlingPostBack Events</i> .....	602
<i>Recap</i> .....	610

<b>Chapter 12 Creating a Composite Control</b> .....	613
Creating a Simple Composite Control .....	613
Varying Styles Within a Composite Control .....	617
Raising an Event from a Composite Control .....	624
Creating a Template Control .....	630
Recap .....	636
 <b>Chapter 13 Building a Web Application</b> .....	 639
Updating a Database from a Web Application .....	640
Authenticating a Visitor .....	665
Viewing Database Information from a Web Site .....	692
Recap .....	717
 <b>Chapter 14 Configuring and Deploying     a Web Application</b> .....	 719
Configuring a Web Application .....	720
Securing a Web Application .....	738
Deploying a Web Application .....	751
Recap .....	765
 <b>Chapter 15 Creating a Web Site</b> .....	 767
Working with a Professional Designer .....	767
Implementing a Web Design .....	775
Encapsulating Design Elements in Controls .....	784
Personalizing Web Pages .....	809
Reading Database Information Efficiently .....	817
Inviting Spiders, Crawlers, and Surfers .....	825
Recap .....	831
 <b>Appendix A Web Design and Usability:     Tips and Tricks</b> .....	 833
Gain Trust Through Clear Writing .....	833
Create Effective, Useful Web Links .....	838
Make Web Pages Easy to Navigate .....	841
Add Value with a Web Site Search Tool .....	843
Produce Fast-Loading, High-Quality Graphics .....	845
Make Your Web Site More Accessible .....	848
Recap .....	849

**Appendix B HTML Quick Reference** ..... 851

*The Doctype Declaration* ..... 851

*The html Section* ..... 852

*The head Section* ..... 852

*The body Section* ..... 854

*Formatting Web Pages with HTML* ..... 854

**Appendix C XML Quick Reference** ..... 863

*Document Object Model* ..... 864

*Node Trees* ..... 864

*Nodes* ..... 866

**Appendix D Setting Up Your Own  
Development Server** ..... 875

*Hardware Requirements for Windows 2000 Server* ..... 878

*Source Code Control* ..... 878

**Index** ..... 879
